

Collaboration with System on Silicon Corporation, USA

MCKV Institute of Engineering, Liluah, Howrah, West Bengal, India has signed an agreement on the 11th of June, 2016 with *System on Silicon Corporation*, a USA/India based research oriented high tech startup specializing in Cloud Computing & Big Data Analytics, based Mobile IoT/IoE solutions, for a long term Industry-Academia collaboration to establish a sustainable "**Science & Technology R&D Incubator**".

SOS Corp, a venture co-founded by a seasoned Software/Hardware expert, **Mr. Rajarshi Ray** with 20+ years of high tech experience and a reputed medical scientist at Mayo Clinic, USA, **Dr. Dave Roy** with 12+ years of experience with a goal to change the healthcare and wellness landscape through engineering and scientific research, consists of accomplished professionals from Software, Hardware, Medical Science, Biological Research, Nano Technology, Healthcare Marketing and Business Finance.

Prof. (Dr.) Parasar Bandyopadhyay, Director MCKVIE, will work closely with SOS as the MCKV representative and the Chief Coordinator of this incubator. MCKV Management and SOS Management strongly believe that this one-of-its-kind initiative will soon turn out to be the cornerstone of "**Engineering & Scientific Excellence**" in West Bengal as well as India and become a platform for exciting research and entrepreneurial opportunities for interested students.

This incubator will offer an R&D platform where students will generate innovative ideas and develop advanced skills under the supervision of SOS Leaders and MCKV professors to create world class products.
